

SEWRPC Technical Report No. 43

STATE-OF-THE-ART OF WATER SUPPLY PRACTICES

DRAFT TABLE OF CONTENTS

(Revised April 26, 2006)

Chapter I—INTRODUCTION

General

Study Area

Scope

Cost Estimation Procedures

Chapter II—INVENTORY OF EXISTING FACILITIES

Introduction

Public Water Supply Systems

Surface Water Supply Systems

Groundwater Supply Systems

Private Water Supply Systems

Other Water Uses

Chapter III—SURFACE WATER TREATMENT TECHNOLOGIES

Introduction

Sources of Cost Data

Surface Water and Groundwater Treatment Technology Applicability

Intake Protection and Pretreatment

Water Treatment Plant Intakes

Raw Water Pumping

Coagulation/Flocculation/Sedimentation

Filtration

 Introduction

 Gravity Filtration

 Pressure Filtration

 Low Pressure Filtration

 Pressure Membrane Processes

Filtration Avoidance

Disinfection

 Chlorination

 Chlorine Dioxide

 Chloramination

 Ozonation

 Disinfection with Ultraviolet (UV) Light

 Multi-Barrier Approach

Miscellaneous Chemical Treatment

 Fluoridation

 Corrosion Inhibitors

Treated Water Pumping

Pharmaceuticals and Endocrine Disrupting Chemicals

Desalination

Packaged/Modular Treatment Systems

Auxiliary Facilities and Requirements

 Water System Security

PRELIMINARY DRAFT

- Laboratory Facilities
- Maintenance Facilities
- Miscellaneous Operations
- Summary
- Typical Treatment Train
- Costs

Chapter IV—GROUNDWATER WITHDRAWAL AND TREATMENT TECHNOLOGIES

- Introduction
- Sources of Cost Data
- Groundwater and Surface Water Treatment Technology Applicability
- Groundwater Wells and Pumping
- Arsenic Treatment
- Radionuclide Treatment
- Synthetic Organic Compounds (Pesticides/Herbicides) Treatment
- Inorganic Nitrogen Compound Removal (Nitrates and Nitrite) Treatment
- Treatment Technology Description
 - Adsorption
 - Ion Exchange
 - Lime Softening
 - Packed Tower Aeration
 - Miscellaneous Treatment Systems
- Summary

Chapter V—SMALL AREA AND INDIVIDUAL WATER SUPPLY SYSTEMS

- Introduction
- Sources of Cost Data
- Residential Private Well Systems
- Community Water Systems
- Agricultural Water Uses
- Other Water Uses
- Costs

Chapter VI—GROUNDWATER RECHARGE AND MANAGEMENT ALTERNATIVES

- Introduction
- Sources of Cost Data
- Artificial Recharge Technologies Process Descriptions
 - Surface Infiltration Methods
 - Subsurface Infiltration Methods
 - Direct Injection Methods, Including Aquifer Storage and Recovery
 - Enhanced Recharge
 - Riverbed Filtration, Including Induced Recharge
 - Water Banking
- Artificial Recharge System Design Considerations
 - Hydrogeologic Factors
- Source Water Considerations
 - Pretreatment for Artificial Recharge
 - Soil Aquifer Treatment
 - Advanced Wastewater Treatment
- Operation and Maintenance Considerations
 - Clogging Issues for Surface Infiltration Systems
 - Clogging Issues for Subsurface Infiltration Methods
 - Clogging Issues for ASR Systems

Regulatory Issues

- Storm Water Infiltration Systems
- Wastewater Infiltration Systems
- ASR Regulations

Relevant Case Histories

- Surface Recharge Systems
- Equus Beds Demonstration Project
- Artificial Recharge of Sandstone Aquifer in Chicago
- Pabst Farms
- Dayton, Ohio
- Lake Geneva, Wisconsin
- ASR Systems

Costs

Chapter VII—WATER CONSERVATION

Introduction

Water Conservation Concepts and Implications

Sources of Cost Data

Current Water Conservation Laws

Municipal Water Conservation Concepts

- Public Education
- Fixture and Plumbing Management
- Water Reuse
 - Industrial
 - Residential

Rate Structures

Use Restrictions

Water System Maintenance and Water Loss Management

Private Water Conservation

Agricultural Water Conservation

Thermoelectric Water Conservation

Water Reuse and Reclamation

- Irrigation
- Gray Water Systems
- Dual Systems

Estimated Conservation Program Impacts

Chapter VIII—TRANSMISSION AND STORAGE

Introduction

Sources of Cost Data

Pumping Systems

Transmission Mains

Distribution Mains

Water Storage

Chapter IX—OBJECTIVES AND STANDARDS

Overall Objectives for the Development of Water Supply Facilities

Design and Planning Standards for Water Supply Facilities

- Water Demands
 - Residential
 - Commercial
 - Industrial
 - Public

- Fire
 - Unaccounted For Water
 - Water Used In Treatment
 - Drinking Water Quality Standards
 - Water System Design Requirements
 - Design Objective
 - Design Standards
 - Peak Day to Average Day Ratio
 - Peak Hour Usage
 - Minimum and Maximum Pressures
 - Fire Flow Requirements
 - Supply and Storage Requirements
 - Source Capacity
 - Peak Hour Storage
 - Fire Flow
 - Emergency Supply
 - Main Looping and Sizing
- Design and Planning Standards for Surface Water Supply, Groundwater Supply, and Recharge Systems
 - Surface Water Treatment Facilities
 - Groundwater Supply
 - Sand and Gravel Wells
 - Dolomite Wells
 - Sandstone Wells
 - Recharge Systems
 - ASR
 - Storm Water Infiltration
 - Wastewater Infiltration
- Cost-Effective Analysis
- Environment Assessment

Chapter X— APPLICATION OF STANDARDS AND COST DATA

Introduction

Considerations in Systems Design

- Hydraulics
- Quantity of Supply
- Water Quality
- Peak Demands
- Conservation Impacts
- Current Capacity Allocations

Cost Considerations for Infrastructure Related Items

Noncost Considerations for Infrastructure Related Items

Use in Alternative Evaluations
